Minister of Health of the Republic of Turkey, Mr. Mehmet MÜEZZİNOĞLU and the Governor of Edirne, Mr. Hasan DURUER visiting our second, state of the art factory situated in the city of Edirne, on the European border and getting information from the senior management.

Minister of Health of the Republic of Turkey, Mr. Mehmet MÜEZZİNOĞLU and the Governor of Edirne, Mr. Hasan DURUER touring our Edirne factory and examining the MEDITEKS products with company managers.

Established in 1999, **MEDITEKS** has made it its priority to excel continuously without compromising the company's basic values whilst complying with the rules of Quality Management. It has been the ultimate goal of the company to maintain increase total customer satisfaction.

The use of high-quality raw materials, coupled with advanced technology that is updated regularly, allows control at each and every stage of production **MEDITEKS**, whose product and service quality is approved both at home and abroad by official certificates, will continue to supply the best quality products at the most competitive prices to its valued clients around the world.

The Mediflex Absorbent Cotton Gauze Bandage is produced from 100%, first grade non-allergenic cotton yarn. They are both much softer and more elastic so there are no loose threads. When used in open injuries in sterilized conditions, the Mediflex Absorbent Cotton Gauze Bandage minimizes the risk of infection. The Mediflex Absorbent Cotton Gauze Bandage is hydrophile (absorbent) so it is highly absorptive in case of bleeding.

* Both sides are woven. There are no loose ends.

The Mediflex Conforming Elastic Bandage is produced by using viscose / cotton in weft thread and polyamide in warp thread. Both sides are woven by weaving machines so there are no loose threads. If required, this bandage can also be sterilized. Since the products are woven by the weaving machines, they are both much softer and more elastic. The Mediflex Conforming Elastic Bandage can be winded in any desired length after being processed in the steam-boiler and the drying machine. The Mediflex Conforming Elastic Bandage has approximately 100 % elasticity. The Mediflex Conforming Elastic Bandage can be used in all areas where light-level support is required.

The Mediflex Self-Cohesive Bandage is self-cohesive so it is practical and easy-to-use. It is commonly used in accidents and as war first-aid. Its air-permeable and non-allergenic texture eliminates the risk of itching. Its soft-strong texture permits blood circulation and thus it can easily be applied to all areas when required for long periods.

The Mediflex Self-Cohesive Bandage sticks only to itself. It is non-sticky to skin or hair. No pins or clips needed.

It is easy to dis-join. The Mediflex Self-Cohesive Bandage is mainly used in the treatment of varicosis, sportive traumas, strains, muscular captures and orthopedic use.

The Mediflex Triangular Bandage is one of the most useful and versatile of medical bandages that can be utilized in an emergency. Amongst the many purposes of the Mediflex Triangular Bandage, the most common are arm-slings and tourniquets. They are also used to hold dressings in place, splints together, to prevent infection and direct pressure

PRODUCT CODE	PRODUCT SIZE	PACKAGING TYPE	NUMBER of PIECES / BOX	BOX DIMENSION
1212179	90cm x 100cm x 135cm	Cellophane - Plastic Bag	600	76x46x52

The Mediflex Padding Bandage is a light-weight bandage that offers protection of bony prominences and absorption of wound exudate. It is primarily used under other forms of compression bandaging and hard casts. The soft, texture of the Mediflex Padding Bandage adheres to the cast and makes it possible to cut the cast easily to individual needs.

The highly extensible Mediflex Padding Bandage can be applied crease-free it does not slip and conforms to any body contour. The padding properties remain un-impaired over the whole period of wear. High water vapour and air permeability, as well as low absorption volume of the tightly-meshed bandage, guarantee a convincing wearer comfort. The high cotton content makes Mediflex Padding Bandage soft and very skin-friendly.

The Mediflex plaster of paris bandage is a porous impregnated fast-setting plaster of paris bandage. On account of the special material structure made of a stable cotton carrier and the even application of the plaster, the Mediflex Plaster of paris bandage can be moistened fast and offer excellent conformability and modelling properties. The Mediflex plaster of paris bandages are available in following presentations:

Bandages for casting with circular plaster of paris bandaging techniques; slabs as a splinting bandage providing additional strength applied on top of circular plaster of paris bandages and large slabs for large plaster casts including plaster-of-paris jackets as well as for extensive moulded casts. Setting time approx. 2-8 minutes.

The Mediflex Non-Sterile Gauze Compress is produced from 100 %, first grade non-allergenic cotton yarn and thus is highly absorbent. It is extremely soft and gentle to the touch; yet strong and durable even when wet. The Mediflex Non-Sterile Gauze Compress is ideal for the general wound treatment, especially suitable in the primary treatment of dirty, infected and highly exudative wounds; as swabs and dressings in minor surgery in the outpatient department and on the ward. The cut edges are folded-in and the lack of any fraying minimizes the risk of any infection. The Mediflex Non-Sterile Gauze Compress is available in different plies and sizes.

Mediflex Instant Cold Pack is easily activated with a simple squeeze for emergency use where cold therapy is required and temporarily relieves minor pain and swelling for sprains, aches and sore joints. It is conveniently disposable with no pre-chilling required for quick, effective relief. Mediflex Instant Cold Pack reaches 0 degrees Celsius (32 degrees Fahrenheit) within seconds after you squeeze the inner bag and release the water into the crystals in the outer bag. The cold lasts from about 20-25 minutes, depending upon the temperature of the area it is placed and the ambient temperature.

Mediflex Instant Cold Pack is great for use within first aid kits and to keep in gym bags and stays at a lower temperature longer than other cold packs. Single use only.

The Mediflex Sterile Adhesive Eye Pad is an oval-shaped eye pad with flexible adhesive backing. Its adhesive backing is hypoallergenic and will also stretch over the eye area. It is easy to apply and extremely absorbent.

Mediflex Sterile Eye Pads prevent infection by stopping any foreign bodies from entering the wound and are ideal to include with your first aid supplies or near your workplace eyewash station.

The Mediflex Sterile Adhesive Eye Pads are also widely used in clinics and hospitals as post operative dressings after eye surgery, cataract operation, corneal ulcer and dressing after eye injury.

Mediflex Re-Usable Cold / Hot Mask is a re-usable face and cosmetic mask with a velvety side that does no harm to skin. It is used on the face for both cold and hot therapy to relieve facial pain and to help in reducing post-operative swelling and bruising.

The compress may be used for a wide range of cosmetic procedures, including chemical peel, collagen injections, eyelid surgery, face lift, laser skin resurfacing, nose surgery, and other procedures. In addition, cold-compress is to relieve pain from headache and migraine, tired and swollen eyes, fever and hangover. Warm-compress is suggested when suffering from catarrh, influenza and sinus inflammation.

The gel contained provides a slow cooling or warming of the face in a natural, drug-free way.
